

roller door profiles | perforated and grid profiles

1.1560 grid profile

description

1.1560 is a profile for single wall roller doors, which as a result of the covering width of 100 mm and its smooth appearance resembles the tried-and-tested 1.100 D roller door section.

Thanks to its large perforations, it achieves light permeability of 42% as a window and grille section, and is a popular choice for protecting objects such as shop window facades due to good transparency and protection.

1.1560

number of slats per mtr	10
thickness of slats	19
minimum size of tube	159
fitting bottom rail(s)	1.1220 1.1278
size of grid cut-outs [mm]	100 x 70
number of grid cut-outs per mtr	6
air / light passage [%]	42

weight per m (m²) at 1,00 mm

steel, stainless steel	1,04 (10,4)
aluminium	0,36 (3,6)

thickness of material [mm]	1,00	1,25	1,50
galvanized steel	•	•	•
galvanized steel, plastic coated	•	•	
aluminium, bright	•	•	•
aluminium, plastic coated	•	•	
stainless steel	•	•	

cross-sectional shape

 3 cm
